CAREER OBJECTIVE

Dedicated Computer Engineering student seeking an internship opportunity in the IT industry to apply my skills in Java, web development, and Prompt Engineering to build scalable, real-world applications. With hands-on experience in AI-driven and React-based projects, I aim to contribute effectively while continuously strengthening my technical and problem-solving expertise.

EDUCATION

V.V.P Engineering College - GTU University Rajkot, Gujarat
Bachelor of Engineering in Computer Science, Minor in IoT July 2023 – Pursuing

Kendriya Vidhyalaya School Rajkot, Gujarat
Higher Secondary Education April 2021 – April 2023

VOLUNTEERING AND LEADERSHIP

Product Communication Jan 2026
V.V.P Engineering College Vibrant Gujarat Regional Conference, Rajkot

- Presented an import-substitute product concept at the Vibrant Gujarat Regional Conference, representing my college and promoting collaborative production.

Anchor Feb 2025
V.V.P Engineering College College Auditorium, Rajkot

- Anchored a college farewell event, managing live audience engagement, script execution, and team coordination to ensure smooth transitions, accurate timing, and effective on-stage communication.

CERTIFICATIONS

Java - Basics Jan 2026
Hacker Rank

- Gained hands-on experience with core Java concepts including control flow, loops, arrays, strings, basic OOP, and problem-solving through consistent coding practice.

Technology Virtual Experience Program (Forge) Dec 2025
Deloitte Australia

- Completed a technology job simulation involving business analysis and preparation of a solution proposal presentation for a real-world client scenario.

PROJECTS

Resume-ai-bot | *Prompt Engineering, Python, Ollama, RAG, LangChain* Jan 2026

- Built an AI-based resume analysis and QnA system by focusing on context-aware responses to natural language questions, making resume evaluation faster and more efficient.

Project-Management | *React.js, Responsive UI, CRUD Operation* Dec 2025

- Developed a responsive React.js project management SPA with component-based architecture and localStorage-based state persistence, improving task management efficiency and ensuring seamless data retention across sessions.

TECHNICAL SKILLS

Tech Languages: Java, Prompt Engineering, Python(basic), HTML/CSS, JavaScript, DBMS(basics)

Frameworks: React.js, TailwindCss

Developer Tools: Git, GitHub, VS Code, IntelliJ, Jupiter NoteBook, Google Colab

Fundamentals: OOPs, Data Structures and Algorithms (Basics), Software Engineering Principles

Libraries: Basics - pandas, NumPy, Matplotlib

Languages: English, Hindi, Gujarati
